

Trave semplicemente appoggiata

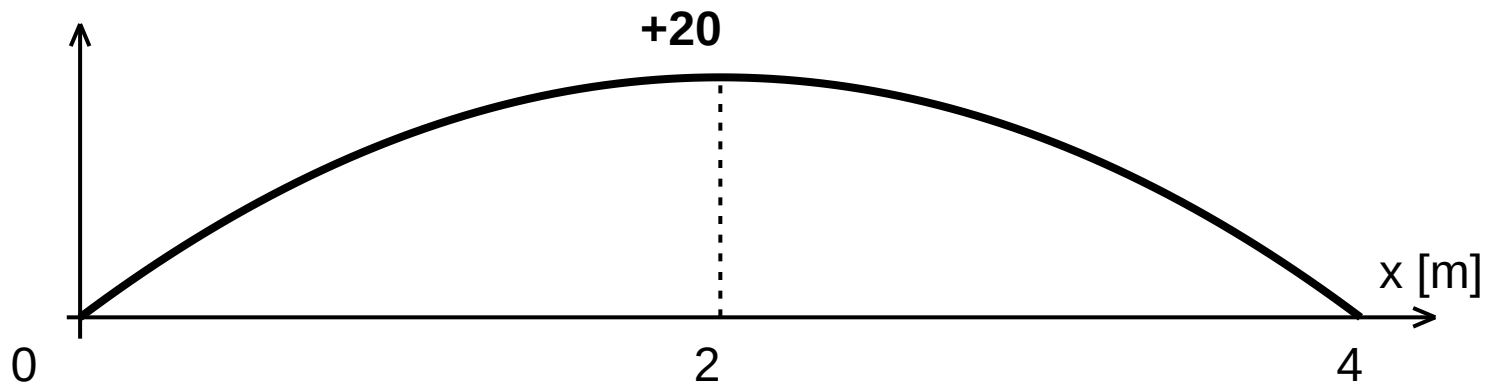

$L = 4 \text{ m}$ | $q = 10 \text{ kN/m}$ uniforme verso il basso

Taglio $V(x) = 20 - 10x \text{ [kN]}$

Momento $M(x) = 20x - 5x^2 \text{ [kN m]}$

M positivo: fibre inferiori tese; diagrammi positivi in alto.
